

DESE Teknik

DESE Teknik brings together building and infrastructure material supply, mechanical installations, heating and cooling, and site contracting. Based in Kuşadası, Türkiye, our approach is to understand the requirement, define a clear scope and coordinate supply with installation.

Building & infrastructure materials

- Building materials and installation requirements
- Pipes, valves, fittings and connections
- Water supply, wastewater and infrastructure materials
- Supporting products for mechanical installations

Mechanical, heating & cooling

- Heating and cooling systems
- Mechanical installations and pipework
- Water systems and equipment connections
- Installation, checks and agreed commissioning scope

Contracting & installation

- Requirements and existing-site assessment
- Coordination of materials and site work
- Phased installation and progress follow-up
- Checks, handover and maintenance requirements
